# High-Grade Unibody Aluminum Material - Quality and Durability

## Aluminum

---

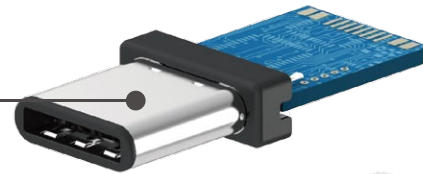

Aluminum, a common element used in the aerospace and automotive industries, is chosen by Just Mobile and mastered into refined elegant accessories. Through precise calculation and testing, from material selection, prototyping, CNC milling, to surface hardening and coloring processes, Just Mobile creates the highest quality products. Form and function are the ideals that we live by. Through mastery in aluminum, Just Mobile creates not only products, but design objects.

# Brand Story

We started in 2005 with a simple mission: to create the most stylish mobile accessories in the world. Aluminum is in our DNA. From innovative stands to stylish backup batteries, everything we make aims to unify form and function. We don't just make products, we make design objects. Just Mobile design objects now span over 40 lines and collected over 140 prestigious international design awards. Our sales channel includes every major markets in the world, including The Apple Store and the NY MoMA design store. Our design team includes some of the world's top product designers - from our in-house team to the master visionaries of Tools Design and Jakob Wagner in Denmark. Everything that we do is guided by our vision of "Less is More", to create beautiful design objects that solve practical real-life problems, to create iconic lasting accessories that people cherish and use for life.
